1 Page Setup

Publish a WordPress Page that uses the **Industries** template.

1**Create the page.**

Dashboard → *Pages* → *Add New*. Title it **Industries**. Slug: `industries` .

2**Assign the template.**

Right sidebar → *Page Attributes* → *Template* → choose **Industries**.

3**Publish.**

Click Publish. Preview at `/industries` .

4**Add to menu.**

Appearance → *Menus* → *Primary Menu*, add the Industries page.

Theme file: `page-industries.php` . Section parts live under `template-parts/industries/` . All defaults render even without ACF filled — page never blank.

2 ACF Field Group — “Industries Page Content”

Title: Industries Page Content · **Location:** Page is *equal to* Industries.
Add a **Tab** field at the start of each section below.

Tab · Hero

LABEL	NAME	TYPE	DEFAULT
Hero Tab	ind_hero_tab	Tab	—
Eyebrow	ind_hero_eyebrow	Text	Built for complex operating environments.
Heading	ind_hero_heading	Textarea	Industries where visibility, control, and execution matter.
Subtext	ind_hero_subtext	Textarea	Kelarix works with businesses where data...
Hero Image	ind_hero_image	Image	Background photo. Return: URL.
Primary CTA	ind_hero_cta_primary	Link	"Request a Diagnostic Conversation" → #contact
Secondary CTA	ind_hero_cta_secondary	Link	"Explore What We Build" → #systems
